A Thematic Textual Analysis of Content Marketing Strategies by Groww

1. Introduction

Content marketing has become an important part of digital marketing, particularly for financial technology companies. Unlike traditional advertising, content marketing focuses on providing useful and relevant information to an audience through blogs, videos, newsletters, social media posts, educational articles and other digital formats. In the financial-services sector, this approach can be especially useful because financial products and investment concepts may be difficult for new users to understand. Groww provides a useful case for studying how educational and informational content can be combined with a digital financial-services platform.

Groww is an Indian digital investment platform founded in 2016 by Lalit Keshre, Harsh Jain, Ishan Bansal and Neeraj Singh. It initially focused on making mutual-fund investing simpler and later expanded into products and services including stocks, IPOs, ETFs, derivatives and other financial products.

An important part of Groww's communication strategy is financial education. The company states that its objective includes helping people understand investing so that they can make informed decisions. Its content initiatives include Groww Digest, blogs, YouTube and social-media channels. Groww's own account of its journey describes these initiatives as part of its broader effort to educate Indians about investing.

Groww Digest is one of its notable content platforms. It provides information about financial markets and the broader economy, while its Sunday edition focuses particularly on investor education. Groww has also experimented with storytelling as a way of presenting financial lessons in an accessible and engaging format.

The company's blog contains educational material on subjects such as fundamental analysis, financial terminology, investment concepts and market-related topics. This indicates that educational content is not limited to promotional messages but also covers basic and

intermediate financial concepts.

Social media is another important component of Groww's content strategy. Groww identifies Facebook, X, WhatsApp, Instagram, YouTube, LinkedIn and its blogs among its official communication channels. The company states that these channels are used for financial insights, market updates, educational content and customer engagement.

Video content is particularly significant in Groww's digital communication. According to the company's 2025 Red Herring Prospectus, Groww's YouTube content includes educational videos and market insights and is available in several Indian languages as well as English. As of June 30, 2025, the company reported more than 4.5 million YouTube subscribers across its channels.

The use of multiple languages is relevant in the Indian context because the country's potential investor base includes people with different linguistic backgrounds and different levels of financial knowledge. By providing content in languages such as Hindi, Kannada, Telugu, Tamil, Gujarati, Malayalam and English, Groww attempts to make financial information accessible to a broader audience.

Groww also uses offline educational initiatives. Its “Ab India Karega Groww” programme has involved workshops in different cities to provide investment-related knowledge. This shows that the company's content and education strategy is not restricted to online communication.

Thematic textual analysis can be used to study these different forms of content systematically. The method involves identifying recurring ideas, concepts, words, messages and themes within a collection of texts. For Groww, themes may include financial education, investment awareness, simplicity, accessibility, market information, customer engagement and digital empowerment.

The study of Groww's content marketing is therefore useful for understanding how a fintech company communicates with its audience. Instead of examining only advertisements, a thematic textual analysis can examine educational articles, blogs, newsletters, social-media communication and video-related content to identify the major themes used in the company's communication strategy.

Groww's content strategy also reflects the changing nature of financial marketing. Consumers

increasingly search online for information before using financial services. Educational content can provide information at different stages of the customer journey, from learning

basic concepts to understanding more advanced investment terminology. Groww's own materials emphasize a do-it-yourself approach in which users can use its educational content and tools to make their own investment decisions.

At the same time, financial content requires responsible communication. Investment-related information can influence how people understand financial products, so accuracy, clarity and appropriate disclosures are important. Content marketing in this sector therefore has both a marketing function and an educational dimension.

Overall, Groww provides a relevant case for studying the relationship between fintech, digital marketing and financial education. Its use of blogs, newsletters, social media, videos, multilingual content and educational initiatives provides a broad textual and digital material base for thematic analysis. The study can help identify the recurring themes in Groww's content and understand how those themes contribute to its communication with users.

2. Objectives

1. To study the content marketing strategies adopted by Groww.
2. To identify the major themes present in Groww's digital content.
3. To examine how Groww uses educational and informative content to engage its audience.

4. To analyse the role of digital content in Groww's brand communication and customer engagement.

3. Review of Literature

1. Content Marketing: Content marketing focuses on creating and distributing useful, relevant and consistent content to attract and engage a target audience.
2. Digital Marketing: Digital marketing provides businesses with multiple channels such as websites, social media, email and video platforms to communicate with customers.
3. Financial Content Marketing: Financial companies increasingly use educational

content to explain complex financial concepts in simpler language.
4. Consumer Education: Educational content can help consumers understand products and services before making decisions.

5. Social Media Marketing: Social-media platforms allow companies to distribute content quickly and interact with their audiences.
6. Video Marketing: Video content can make complicated subjects easier to explain and can increase audience engagement.
7. Fintech Marketing: Fintech companies use digital communication to build awareness of their products and develop relationships with technology-oriented consumers.
8. Thematic Analysis: Thematic analysis involves identifying repeated concepts and patterns in textual material and grouping them into broader themes.
9. Investor Education: Financial education content can improve awareness of investment concepts and terminology.
10. Groww's Content Strategy: Groww's own publications show recurring emphasis on financial education, market information, accessibility and customer engagement through blogs, newsletters, social media and videos.

4. Company Profile

Particular Details
Company/Platform Groww
Founded 2016
Founders Lalit Keshre, Harsh Jain, Ishan Bansal and Neeraj Singh
Industry Fintech / Digital Investment Services
Main Services Mutual funds, stocks, IPOs, ETFs, derivatives and other

financial products

Business Type Direct-to-consumer digital investment platform
Major Content Channels Groww Digest, blogs, YouTube and social media
Parent/Operating

Company Billionbrains Garage Ventures Limited

Groww was founded in 2016 and initially focused on simplifying mutual-fund investing before expanding into other investment products.

As of September 17, 2026, Groww's investor-relations page reports 23.2 million transacting users and lists products including mutual funds, stocks, derivatives, credit and related financial services.

5. Business Model

Groww follows a digital, direct-to-consumer financial-services platform model.

1. Digital Platform: Customers access Groww's services through its digital platform.
2. Investment Products: The platform provides access to products such as mutual funds, stocks, IPOs, ETFs and derivatives.
3. Technology-Based Service: Technology is used to provide users with tools and information for managing their financial activities.
4. Customer Education: Groww provides blogs, videos and other educational content to help users understand financial concepts.
5. DIY Approach: Groww states that it does not provide stock or mutual-fund advisory services and instead provides tools and information that users can use to make their own decisions.
6. Digital Engagement: The company uses social media, newsletters and other digital channels to maintain communication with its audience.

6. Revenue Model

Groww's revenue model is connected primarily to its financial-services platform and the transactions/services undertaken through it.

Major revenue sources include:

1. Brokerage and Transaction-Related Revenue – Revenue associated with eligible trading and investment-related services.
2. Interest and Financing-Related Revenue – Groww has expanded into credit and margin-related financial services.

3. Subscription/Service-Related Revenue – Certain financial services may generate service-related income.

4. Other Financial-Service Revenue – The company's expanding financial ecosystem provides additional potential revenue streams.

5. Scale of Digital Operations – Groww's digital platform allows it to serve a large customer base through technology.

For FY2025, Groww reported revenue from operations of ₹3,901.72 crore, compared with ₹2,609.28 crore in FY2024.

7. PESTLE Analysis

Political

Government policies supporting digital financial services can affect fintech companies.

Financial markets and investment platforms operate within a regulated environment.

Changes in government policy can influence the fintech industry.

Economic

Changes in income and savings patterns can affect investment participation.

Market conditions can influence trading and investment activity.

Economic growth can increase demand for financial products.

Social

Increasing financial awareness creates demand for educational content.

Younger consumers are increasingly comfortable with digital financial services.

Multilingual content can help reach audiences across different parts of India.

Technological

Mobile applications and digital platforms are central to Groww's services.

Artificial intelligence and data analytics can improve digital experiences.

Cybersecurity is important because the platform handles financial and personal information.

Legal

Groww operates within India's financial-market regulatory framework.

Rules relating to securities markets, investor protection and data privacy affect its

operations.

Regulatory changes can influence digital investment platforms.

Environmental

Digital services can reduce dependence on physical paperwork.

Online communication can reduce some requirements for physical visits and printed materials.

Digital infrastructure nevertheless requires significant computing and energy resources.

8. SWOT Analysis

Strengths

1. Strong digital presence and brand recognition.
2. Large user base and broad product ecosystem.
3. Extensive financial-education content.
4. Multilingual digital content.
5. Multiple communication channels including blogs, newsletters, YouTube and social media.

Weaknesses

1. Heavy dependence on technology and digital infrastructure.
2. Financial concepts may still be difficult for some users despite educational content.
3. Dependence on changing market conditions.
4. Digital customer service may not meet every user's individual requirements.

Opportunities

1. Growing interest in financial literacy.
2. Increasing adoption of digital financial services.
3. Expansion of multilingual educational content.
4. Growth of video and social-media consumption.
5. Increasing participation from first-time investors.

Threats

1. Strong competition from other fintech and investment platforms.
2. Cybersecurity and data-privacy risks.

3. Changes in financial-market regulations.

4. Changing user expectations and digital trends.

5. Market volatility can affect user activity and platform engagement.

9. Findings

1. Groww uses content marketing as an important part of its digital communication strategy.

2. Financial education is one of the recurring themes across its blogs, newsletters and videos.

3. Groww Digest provides regular financial-market information and dedicated investor-education content.

4. Groww uses multiple digital channels, including YouTube, Instagram, LinkedIn, Facebook, X and its blogs.

5. Video content is an important part of Groww's educational communication.

6. Groww uses multilingual content to reach audiences in different parts of India.

7. Simplicity and accessibility are recurring themes in the company's communication about investing.

8. Groww combines educational content with its digital investment platform, creating a connection between information and its financial-services ecosystem.

9. Thematic analysis indicates recurring themes of financial literacy, investment awareness, simplicity, accessibility, digital engagement and market information.

10. Groww's content strategy demonstrates how fintech companies can use educational and digital content to communicate with users and support financial awareness.

Conclusion

1. Groww uses simple and easy-to-understand content to communicate financial concepts to its target audience.

2. Its content marketing focuses on financial education, helping users understand investing, stocks, mutual funds, and personal finance.

3. Groww uses social media, blogs, videos, and digital platforms to reach a wider audience.

4. The brand uses informative and engaging content to build awareness and attract potential investors.

5. Groww's content strategy emphasizes simplicity and accessibility, particularly for young and first-time investors.

6. Consistent digital communication helps Groww maintain brand visibility and audience engagement.

7. The analysis shows that educational content can support trust-building and customer awareness in the fintech sector.

8. Overall, Groww's content marketing demonstrates how digital financial education can be combined with brand communication.
